PROFILE

I am a fast-learning professional transitioning into software development, currently completing a degree in Programming and Internet Technologies. Skilled in TypeScript, Java, and Python, I excel in troubleshooting and have a solid understanding of agile methodologies and CI/CD pipelines. Experienced in handling administrative tasks, project coordination, and quickly adapting to new technologies, I have sharpened my problem-solving skills through diverse academic projects. I am eager to take on significant software functions, thrive in tackling complex challenges, and possess robust verbal and written communication abilities. My combination of technical expertise and experience is well-suited for a tech-focused role.

PROJECTS

SimpleBean - Typescript + C#

Build an E-commerce for an specialized coffee store, focusing in user experience and sales management by the owner.

- UI/UX design
- The project was managed using Agile methodologies.
- Technologies : ReactJS using TS, ASP.NET and SQLServer
- Structure : MVC

TaskTrace - Java

[tasktrace.app](#)

TrackTrace is a task management tool for keeping track of individual tasks. It makes it easy to see where each task is from start to finish, which helps users to work more efficiently. With simple and clear task details and progress reports, TrackTrace aims to make both personal and team projects more organized.

- UI/UX design
- The project was managed using Agile methodologies.
- Technologies : JavaEE, Apache TomCat and MySQL.
